This *Index to The Canadian Surveyor* covers all issues from Volume XIII, No. 1, to Volume XXIII, No. 5, that is, all issues for the years 1956 to 1969, inclusive. It supplements but does not supplant the previous comprehensive index published in 1955 and incorporates all the material listed in the various annual indices issued subsequently.

References are given in the form:

Volume (issue number) inclusive paging e.g. xvii(2)68-79.

Entries are normally made by author and title. Occasionally, additional entries are made according to derived titles based on particular key words.

This index includes, on page 31, a list of addenda and errata for the 1955 *Index*.
