

Call for Papers - Geomatics Atlantic 2010

(www.geomaticsatlantic.com)

Thursday, Oct. 28th and Friday, Oct. 29th, 2010

Delta Hotel

Fredericton, New Brunswick

The Canadian Institute of Geomatics New Brunswick Branch would like to invite interested parties to submit proposals for papers / presentations that support this year's conference theme "**Surveying the Past, Mapping our Future**". The theme was chosen in honour of the Department of Geodesy and Geomatics Engineering, at the University of New Brunswick, which is celebrating its 50th anniversary this year.

We'll be "**Surveying the Past**" as in 2010 we'll be celebrating 50 years since the first offering of the degree in Surveying Engineering (now Geomatics Engineering) at UNB. We'll be "**Mapping our Future**" as we also want to hear about the latest trends, ideas and technology across the breadth of geomatics that will enable us to have successful careers in the future.

Papers / presentations should be proposed in the form of an abstract and include:

- Title, author's name and contact information, including title, employer, address, telephone, fax and e-mail
- Identification of primary speaker where different from the author or where there are multiple authors
- Abstract (no more than 300 words)
- Author's biographical information (no more than 150 words)
- List of any other publications / venues where the paper / presentation may have been previously published / presented.

New Brunswick Branch

All abstract submissions must be made by e-mail to Sue Nichols at nichols@unb.ca. By submitting an abstract, the author agrees to its publication in the final program and on the Geomatics Atlantic 2010 web site if it is accepted.

The committee will assess the proposals received and invite the selected authors / presenters to present their paper / presentation at Geomatics Atlantic 2010.

Each paper / presentation will be allotted 30 minutes total in the conference schedule: 20 minutes for the presentation and 10 minutes for questions. All documentation must be submitted in MS Power Point, MS Word or Adobe PDF formats. By submitting a paper / presentation, the author(s) agrees to its publication as part of the Geomatics Atlantic 2010 proceedings.

Deadlines

- Submission of Proposal: July 30, 2010
- Notification of Acceptance: August 15, 2010
- Submission of Final Paper: October 14, 2010

A complimentary conference registration will be extended to the primary speaker for each paper selected to be presented.

In addition to the paper presentations, come celebrate the 50th Anniversary of the Department of Geodesy and Geomatics Engineering at UNB with us on October 29th. That afternoon session of Geomatics Atlantic 2010 is dedicated to that anniversary, a gala reunion event is planned for that evening, and other reunion events are planned over the weekend – further details are available at gge.unb.ca.
