Jean-Noël Lechasseur and Selection Committee
Geomatics Canada Scholarship Awards Program
900, Rue Dynes Road
Suite/Bureau 100 D.
Ottawa, Ont.
K2C 3L6

Dear Jean-Noël and Selection Committee Members,

Please accept my warm and heartfelt thank you for honoring me with the award of a Geomatics Canada Scholarship.

As I work on my Bachelor of GIS Degree at Selkirk College I will use the money for tuition, books and living expenses. Receiving this award means a lot to me and has been an excellent confidence builder and an enormous financial support.

The membership with the Canadian Institute of Geomatics is much appreciated. It will be a pleasure and a learning experience to read Geomatica. I look forward to seeing my bio published; it will be a great thing to share with my family.

Recently I completed a GIS Co-op work term with BC Timber Sales Strait of Georgia Business Area. Shortly after that I applied for a GIS/Remote Sensing Instructor's position at Selkirk College. Gaining further work experience is one of my priorities that I will be actively pursuing targeting the Ministry of Forests and Range, the Protection Branch and the Regional Districts of Central Kootenay and Kootenay/Boundary.

As a recipient of a Geomatics Canada Scholarship Award I am honored and thankful. The future is bright as I move ahead with further courses in Cartography, Geography and Business. My further sights are set on a Master's Degree in GIS from the University of Calgary.

Yours truly,

Tammy Steen, RFT
