
News Release: Student Members

February 2006

In an effort to increase student interest and enrolment in the Canadian Institute of Geomatics (CIG), the New Brunswick Branch of the Canadian Institute of Geomatics has offered to purchase a one (1) year membership to the Canadian Institute of Geomatics for any Geomatics and Geodesy Engineering (GGE) student graduating this year from the University of New Brunswick and for any GIS Technology student graduating this year from the New Brunswick Community College in Moncton.

“One of the objectives of the Canadian Institute of Geomatics is to enhance public awareness of the role that geomatics plays in our daily lives,” says Mark Doucette, Chair of CIG’s New Brunswick Branch. “This donation to all students graduating in the field of Geomatics will help to promote and foster professional association with the graduates and to raise awareness of geomatics in New Brunswick and Canada.”

The Canadian Institute of Geomatics is a non-profit scientific and technical association which is devoted to advancing the development of geomatics in Canada. Geomatics encompasses the scientific, managerial and technical processes of the fields of surveying, mapping, remote sensing and geographic information systems.
