

CAREER OPPORTUNITY

McElhanney

POSITION TITLE Project Manager – LiDAR

STATUS Full Time, Permanent

LOCATION Canada, Remote

The Opportunity

We are seeking a Project Manager to join our growing Geospatial team in Vancouver. This is a great opportunity for a motivated individual who wants to take the next step leading project teams, who is familiar with both public and private sector LiDAR projects and who has a passion for project delivery. This role is ideal for someone who is looking for an expanded opportunity in Project Management, while maintaining a focus on technical capability, communication skills, business development, and bringing technological innovation to clients.

Our ideal candidate will enjoy working with a dynamic Geospatial team in a fast-paced environment. McElhanney's culture of mentorship and career growth makes this position ideal for the successful candidate to be mentored by senior management and geomatics specialists within our organization. This position provides the ability to work remotely, or from any McElhanney office.

As this position is part of our Vancouver Branch, preference will be given to candidates who are based locally. Consideration will be given to candidates that may be based elsewhere across Canada with the opportunity to work remote and can travel to Vancouver as needed.

What You'll Be Doing

- You will manage all aspects of LiDAR projects, including, but not limited to, bidding on new projects, managing the technical aspects to meet client requirements, controlling the budgets and ensuring quality deliverables
- Assist Senior PM's on larger scale projects and with business development initiatives
- Develop and maintain relationships with new and existing clients and work to develop new business opportunity and strategic relationships.
- Oversee the production of LiDAR, which will include project specific data management, processing metadata production, control survey establishment and incorporation, and quality control
- Generate invoices for clients and track against agreed client budgets, communicate and manage change order requests, and work with clients to ensure timely payment
- Manage multidisciplinary teams and provide mentorship and guidance to field and geospatial office staff
- Chair regular project meetings with clients and internal staff

- Coordinate with other team members and monitor project progress to ensure schedules, budgets and quality control standards are achieved
- Provide leadership in safety and quality management practices
- Create and review technical reports

What You'll Bring

- Diploma or Degree in a geospatial related fields such as geomatics engineering, remote sensing, photogrammetry, geographic information systems (GIS), survey, etc.
- 5+ years of experience in a geospatial role, demonstrating competency in LiDAR.
- Experience and knowledge high level of competence with latest software packages related to mapping, drafting, data processing, data management, and project delivery
- Excellent written and verbal communication skills
- Previous experience with proposal writing
- Knowledge of ASPRS, GeoBC and NRCAN LiDAR specifications is an asset
- Having a PEng or eligible to apply is an asset
- High productivity, attention to detail, and an ability to work well as a team player
