

Where ideas work

Ministry of Forests, Lands, Natural Resource Operations and Rural Development Kamloops

GIS Technician

\$51,845.18 - \$58,873.38 annually

BC Timber Sales (BCTS) plans, develops, and sells through auction, a substantial and representative portion of the Province's annual available timber volume. The bid prices received from auctioned timber support the Market Pricing System (MPS) in setting stumpage rates for coastal and interior operating areas of the province.

To find out more about our program check out [the BCTS website](#)

The GIS Mapping Technician creates digital, graphic and descriptive products to support resource planning through the use of GIS. The GIS Mapping Technician supports planning and operational initiatives through data input, manipulation, and quality control as well as map production and generation of associated reports for GIS analysis to provide insight into resource management.

The BC Public Service offers a healthy work/life balance, excellent benefits, including one of the best [pension plans](#) available, and a variety of opportunities for career learning and development. To find out more, explore [What the BC Public Service offers You](#).

A career path in BC Timber Sales offers exceptional opportunities to develop new solutions to complex problems, and to learn and grow personally and professionally. Existing and future BCTS employees have the opportunity to impact public and private forests, communities, the economy and the lives of British Columbians in positive and unique ways.

Qualifications for this role include:

- Diploma or degree in geographic information systems, or in relate field, such as natural resources or geography and one year (gained within the last three years) of related experience. Or
- Equivalent combination of training and three years (gained within the last five years) related experience.
- Experience capturing, converting, creating, editing and maintaining digital information in a GIS environment.
- Experience creating a variety of digital, geographical and descriptive products including thematic maps, terrain models and associated descriptive statistics.
