Civil Engineering Technologist/3D Modeler

North Construction, and its affiliate – Spitfire Drone Survey, is currently seeking a full-time Civil Engineering Technologist/3D Modeler.

Essential Responsibilities:

- *Work with aerial photogrammetry systems*
- *Work with 3D mapping and modeling software in Structural and Civil applications*
- *Prepare accurate 3D models for site analysis and field layout*
- *Import survey data to 3D software to produce ground models and contours*
- *Assist with field survey including aerial photogrammetry survey*
- *Assist with interpretation of civil design drawings and specifications*
- *Perform topographic survey and quantity calculations*
- *Conduct as-built surveys and verify that the work was completed to the design and specifications set on plans*

Minimum Requirements:

- *Civil construction experience plus a related diploma*
- *Experience with AutoCAD Civil 3D, Trimble Business Center or other 3D modeling software*
- *Ability to efficiently work in a fast-paced environment*
- *Accurate interpretation from engineer drawings*
- *Ability to organize and operate on multiple work fronts efficiently*
- *Good team-working skills*

Industry leading wages, great benefits, challenging projects.
