

AIRBORNE SENSING

THE AIRBORNE SENSING CORPORATION is seeking aircrew for its photo survey operations. We are looking for photo navigators.

Photo navigators: Proficient in the operation of digital cameras and LIDaR devices as well as in flight planning and post flight processing

Training will be given, operation is out of Oshawa.

While this could be seen as an entry level position for a recent geography or geomatics graduate, this could also lead to a leadership position within the organization.

Useful attributes are:

- Good disposition
- Good geographic sense
- Willingness and ability to solve problems in real time
- Analytical sense with an affinity for mathematics
- Willingness to travel sometimes on short notice and to places not commonly found on tourist maps

French English capability
