SANI-ITA achieves registration to ISO 9001:2015

SANI-INTERNATIONAL TECHNOLOGY ADVISORS INC. (SANI-ITA) has achieved ISO 9001:2015 registration following a review of its process-based Quality Management System. SANI-ITA has been ISO registered since 1998 and was previously certified to the ISO 9001:2008 Standard.

SANI-ITA is a privately owned Canadian Corporation, established in January, 1998. The Company specializes in Professional Land Survey services that includes softcopy photogrammetry and remote sensing. It is unique in that it is also a photogrammetric Training Centre, a TerraGo Technologies desktop and mobile products distributor, an authorized reseller for LizardTech compression software, and distributor for BAE SYSTEMS Geospatial Xploitation Products and ImageSat International.

ISO 9001 is the world's most widely recognized standard for quality management systems. The latest revision was published on September 23, 2015. Organizations that meet the standard consistently provide products and services that meet customer and regulatory requirements. The 9001:2015 version of the standard ensures that organizations adapt to today's changing business environment.

Anthony Sani, President and CEO said his company is one of the first organizations in the field of Geomatics to have achieved the registration to the new standard. Commenting on the achievement, he noted that employees accomplished the task well in advance of the 2017 deadline. "We have been committed to the implementation of the ISO Standard since our company's inception, and it continues to be an integral part of our management system. We are passionate about service delivery and are committed to providing innovative, high quality and timely services that meet our client's specifications. We are eager to help them maximize their returns on investment in both the short and long term and help them minimize the risk profile of their geomatics and information technology requirements. ISO 9001 help us in these endeavors."

The registration audit took place on September 15, 2016. Certification was conducted by ABS Quality Evaluations, part of the ABS Group of Houston, Texas.
